How to Clean

The Klauer Classic™ Aluminum Trim products finish is recognized as a reliable and durable coating, but, as with any exterior surface, dirt and mildew may collect on it. Where conditions of soiling do occur, the following instructions will enable you to care for the finish on your Klauer Classic™ Aluminum Trim products.

For surface dirt, an occasional washdown with a garden hose and a soft bristle brush is recommended. In moderately dirty atmospheres, wash in the same manner, but replace clear water with a normal solution of water and normal household detergent.

In a heavy industrial atmosphere, use ordinary non-abrasive household detergents, such as 1/3 cup detergent (Tide®, for example) and 2/3 cup trisodium phosphate (Soilex®, or Spicand-Span®) mixed in a gallon of water. Follow cleaning instructions above and manufacturer's direction.

For mildew accumulation, which can occur on surface of all types (normally appearing as black spots), remove by using the cleaning method for moderately dirty atmospheres and basic solution of the following ingredients:

- a. 1/3 cup detergent (Tide®)
- b. 2/3 cup trisodium phosphate (Soilex®)
- c. 1 quart sodium hypochloride 5% solution (Clorox® for example)
- d. 3 quarts of water

CAUTION: STRONGER CONCENTRATIONS OF CLEANERS MAY CAUSE DAMAGE TO THE FINISH. IMMEDIATELY AFTER WASHING WITH DETERGENT OR OTHER CLEANERS, RINSE ALL SURFACES THOROUGHLY WITH A GARDEN HOSE. AVOID VIGOROUS RUBBING WHICH MAY CAUSE UNDESIRABLE GLOSS AREAS OF THE FINISH. AVOID SKIN AND EYE CONTACT. IN ALL CASES, FOLLOW MANUFACTURERS INSTRUCTIONS FOR USE OF CLEANING COMPOUNDS AND SOLUTIONS.

NOTE: Klauer Classic™ Aluminum Trim products have been designed and manufactured to perform best when installed by qualified installers.
